Experience

ThoughtSketch — Flutter Developer/ UI/UX Designer

Pune, India (Remote) | 01/2025 – 11/2025

- Designed end-to-end mobile app flows including authentication, password recovery, and confirmation screens.
- Created pixel-perfect UI based on Figma designs while maintaining visual consistency.
- Built reusable components and scalable design patterns.
- Defined navigation structures and interaction behavior to improve usability.
- Collaborated closely with developers to ensure accurate implementation.
- Developed a complete Forgot Password and Reset Password flow, including UI, validation, API integration, and success screens.

- Built nested navigation using GoRouter with dynamic state highlighting and bottom navigation structure.
- Created reusable UI components aligned with a Figma-based design system for consistency across the app.
- Implemented backend modules including location autocomplete and business details update API with JWT authentication.
- Integrated Google Places API via backend for real-time suggestions and detailed location retrieval.
- Wrote unit tests using Mockito and followed a clean Arrange-Act-Assert pattern.
- Enhanced CI/CD pipeline with Firebase App Distribution for streamlined release management.
